

toolstar® shredderWIN

Wipes all your data securely
and irreversibly

Wipe GLOBAL

The shredder software deletes your data securely & irrevocably

- Windows application (32+64bit) for easy use. It's self-booting via Windows PE. No installation necessary.
- Deletes according to the most important German and international standards
- The entire process can be fully automated
- For HDD, SSD, NVMe, USB, SD cards, etc.
- Deletes entire data media or individual partitions
- Audit-proof deletion certificate for each individual panel
- Detailed system information and serial numbers in the log

"Irreversible secure data deletion in accordance with the guidelines and requirements of the Federal Office for Information Security (BSI) is one of the core competencies of the Asset Recovery Center in Mainz. All known standards are fulfilled. In addition, the data deletion and hard disk destruction have been examined by TÜVSüd. Thus, Geodis guarantees its customers maximum security for their company's own data".

IT-Business - User report Geodis

"toolstar® is our central tool for qualification and secure data wiping"
Thomas Hofer, Managing Director

Revision-proof deletion even without Windows:

toolstar®shredderLX

You can use the self-booting shredding software independently of the operating system and delete entire PCs and servers. Delete several hard disks simultaneously according to national and international security standards and log your work. Each hard disk receives its own deletion certificate.

SHREDDER

diagnostic solutions

Today, hard drive data must be better protected than paper documents. This also applies to reuse and disposal. In addition, the legislator also prescribes deletion in the Federal Data Protection Act in the version of May 2001. The DSGVO has further tightened the requirements. The toolstar® shredderWIN offers you the possibility to delete data from hard disks and other media such as USB sticks, SD cards, RAID systems in an audit-proof and above all verifiable way.

toolstar®shredderWIN guarantees data security when buying/selling used PCs.

Important for everyone who has to protect his and other people's data:

- Administrators, PC dealers, service technicians, system houses ...
- Remarketers, processors, IT brokers and IT managers ...
- Managing directors, lawyers, doctors, tax consultants, authorities ...
- Individuals

toolstar®shredderWIN deletes directly under Windows (32+64bit) according to national and international security standards. No installation is necessary.

The software is freely configurable and automatable for your individual use. The software that can be adapted to all your requirements.

Delete entire disks or individual partitions.

The individually customizable informative protocols with serial number document your work - configurable with your company logo and customer information if desired. In addition, you receive an encrypted deletion certificate for each individual disk.

Delete up to 4 media simultaneously in the Standard Edition.
